

ARIZONA HOUSE OF REPRESENTATIVES FLOOR AMENDMENT EXPLANATION

57th Legislature, 2nd Regular Session

Majority Research Staff

HB 2056: appropriation; brackish groundwater; feasibility study

GRIFFIN FLOOR AMENDMENT

1. Removes a requirement that the study include the cost to treat and transport any water and dispose of any brine. (Sec. 1)
2. Modifies the locations the study must be conducted in by:
 - a. removing Gila Bend and the West Salt River valley; and
 - b. adding Willcox and the Hualapai valley. (Sec. 1)
3. Requires ADWR consult with the State Land Department, local officials, political subdivisions and property owners in or around each studied area to identify information regarding the feasibility of constructing and operating brackish groundwater recovery and treatment facilities. (Sec. 1)
4. Makes conforming changes. (Sec. 1)

GRIFFIN FLOOR AMENDMENT
HOUSE OF REPRESENTATIVES AMENDMENTS TO H.B. 2056
(Reference to printed bill)

Amendment instruction key:

[GREEN UNDERLINING IN BRACKETS] indicates text added to statute or previously enacted session law.

[Green underlining in brackets] indicates text added to new session law or text restoring existing law.

~~[GREEN STRIKEOUT IN BRACKETS]~~ indicates new text removed from statute or previously enacted session law.

~~[Green strikeout in brackets]~~ indicates text removed from existing statute, previously enacted session law or new session law.

<<Green carets>> indicate a section added to the bill.

~~<<Green strikeout in carets>>~~ indicates a section removed from the bill.

1 The bill as proposed to be amended is reprinted as follows:

2 Section 1. Department of water resources; feasibility study;
3 brackish groundwater desalination project sites;
4 appropriation

5 A. The department of water resources shall conduct a feasibility
6 study of potential brackish groundwater desalination project sites~~;~~
7 ~~including the cost to treat and transport any water and dispose of any~~
8 ~~brine. The study shall be conducted] in [the areas of Gila Bend,]~~
9 Ranegras Plain, [the west Salt River valley] [Willcox, the Hualapai
10 valley] and the Little Colorado River plateau.

11 [B. The department of water resources shall consult with the state
12 land department and local officials, property owners and political
13 subdivisions located in or around each area listed in subsection A of this
14 section to identify the following for each area:

15 1. The most probable and cost-effective potential sites to
16 construct and operate a brackish groundwater recovery and treatment
17 facility, including the most cost-effective potential points of withdrawal
18 and accounting for factors such as land ownership, legal access, depth to
19 water and hydrology.

20 2. The potential size, scope and cost of construction and operation
21 of a brackish groundwater recovery and treatment facility, including
22 identification of the most probable and cost-effective water treatment
23 method.

24 3. The most probable, cost-effective and environmentally feasible
25 use and plan for brine disposal, including the method and location of
26 brine disposal.

27 4. The potential volume of potable water that a brackish
28 groundwater recovery and treatment facility in the area could create and

1 the identification of the most probable end user, including the expected
2 cost and method of transportation to the most probable end user.]

3 [B.] [C.] The sum of \$100,000 is appropriated from the state
4 general fund in fiscal year 2026-2027 to the department of water resources
5 for the study required by subsection A of this section.
